

# **SOUTH AREA COMMITTEE ENVIRONMENTAL IMPROVEMENT PROGRAMME**

Cambridge City Council has introduced a new four year Environmental Improvement Programme with an annual budget of £200,000, allocated by population share to each Area Committee.

Individual Area Committees will be responsible for leading their own programme, which aims to provide environmental benefit to the local and wider community through improvements to the appearance of their local area.

The Members of South Area Committee invite you to submit any ideas you may have for ways of enhancing your local area. Examples of previously delivered schemes include hard and soft landscape improvements, access improvements such as mobility crossings, protection and improvements to verges and provision of new street furniture such as bins, benches and bollards.

Your ideas will be assessed by representatives from relevant council departments and then considered by members of South Area Committee to determine their viability for further consultation and development as part of the programme for 2011/12.

For further information on the Environmental Improvement Programme please visit [www.cambridge.gov.uk](http://www.cambridge.gov.uk).

Please complete the sections below and either hand in to the Committee Manager or return to the address appended below.
